

1.1 Install Elastic Agent on kali linux

Install Elastic Agent on kali linux

- 1- click Add Agent
- 2- choose linux
- 3- run the output command the fleet generate it with high privileges **on the kali machine**

```
sudo ./elastic-agent install --force --url=https://192.168.159.132:8220 --enrollment-token=eENEM0Fwb0JkZUx1RDUXYlJkU0o6MzJxWmFmaThla2ZieGxyZWRfMTBEUQ== --insecure
```

Filter your data using KQL syntax							Status 5	Tags 1	Agent policy 2	Upgrade available
Showing 2 agents										
Clear filters ● Healthy 2 ● Unhealthy 0 ● Orphaned 0 ● Updating 0 ● Offline 0 ● Inactive 0 ● Unenrolled 0 ● Uninstalled 0										
☐	Status	Host	Agent policy	CPU	Memory	Last activity	Version	Actions		
☐	Healthy	kali	kali-lpolicy rev. 1	N/A	N/A	20 seconds ago	9.1.5	...		
☐	Healthy	SOC	Fleet Server Policy rev. 3	N/A	N/A	33 seconds ago	9.1.5	...		
Rows per page: 20										
< 1 >										

Now the elastic agent correctly linked with fleet server
