Add Elastic Defend integration to Agent policy

Add integration to policy

windows

You are adding an integration to the selected policy.

Edit the necessary fields to configure your selected integration:

Elastic Defend - Need more info? [Read more about Elastic Defend](#)

Integration settings

Choose a name and description to help identify how this integration will be used.

Integration name

windows-EDR

Description

[Advanced options](#)

Select configuration settings

Use quick settings to configure the integration to **protect your traditional endpoints** or **dynamic cloud environments**. You can make configuration changes after you create the integration.

Select the type of environment you want to protect:

Traditional Endpoints (desktops, laptops, virtual machines) ⌵

☐ Data Collection

Augment your existing anti-virus solution with advanced data collection and detection

☐ Next-Generation Antivirus (NGAV)

Machine learning malware, ransomware, memory threat, malicious behavior, and credential theft preventions, plus process telemetry

☐ Essential EDR (Endpoint Detection & Response)

Everything in NGAV, plus file and network telemetry

☒ Complete EDR (Endpoint Detection & Response)

Everything in Essential EDR, plus full telemetry

Cancel

Add integration
